

# Logging in to *Destiny*

(Chickering's Library Catalog ... accessible 24/7 ... anywhere in the world!)

Access via two methods:

- Open Internet Explorer (works best in this browser)

A. Enter the following URL:

<http://destiny.doversherborn.org>

Please see step #3 below.

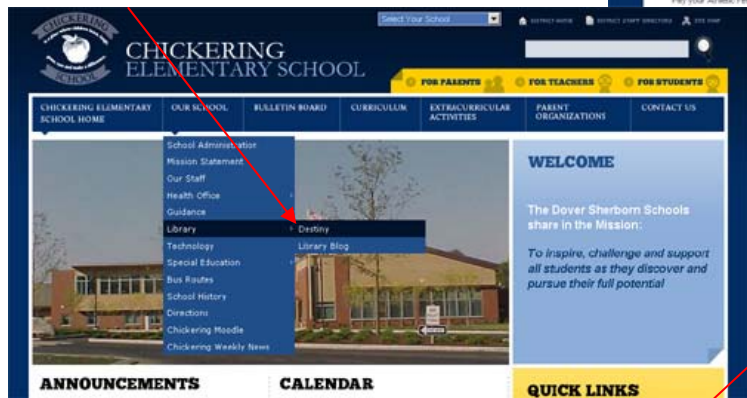

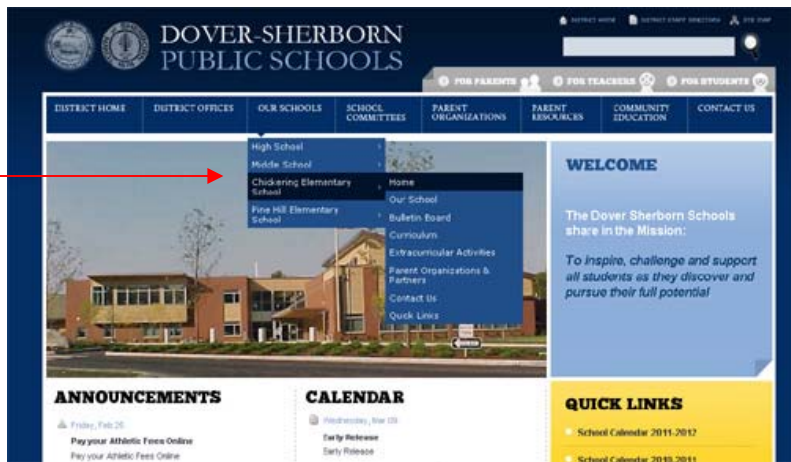

OR

B. Enter the following URL:

<http://www.doversherborn.org>

1. On the menu bar ... go to **OUR SCHOOLS** and choose *Chickering School* from the drop-down menu.

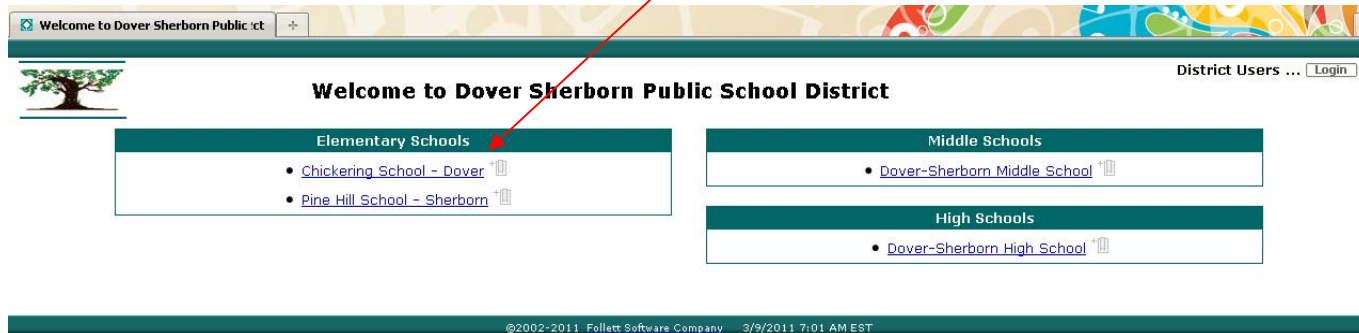

2. On the menu bar ... Go to **OUR SCHOOL** then *Library - Destiny* from the drop-down menu.

3. On the Destiny District Page ... Click on *Chickering School – Dover* under the Elementary section on the left.

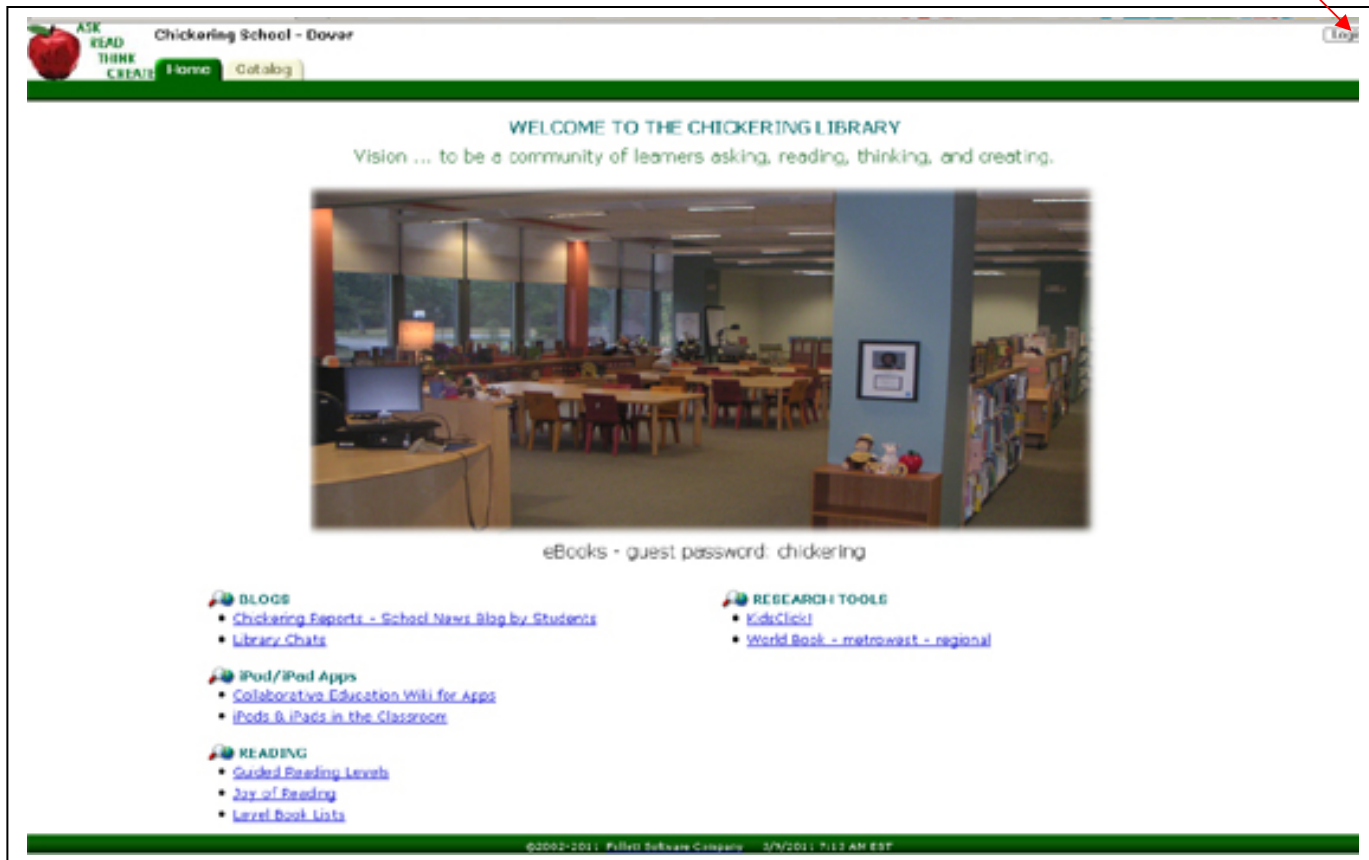

When the Chickering Destiny Homepage opens, bookmark the page in your

browser. This way you won't have to do these three steps again. ;-)

# Welcome to the Chickering Homepage

Login

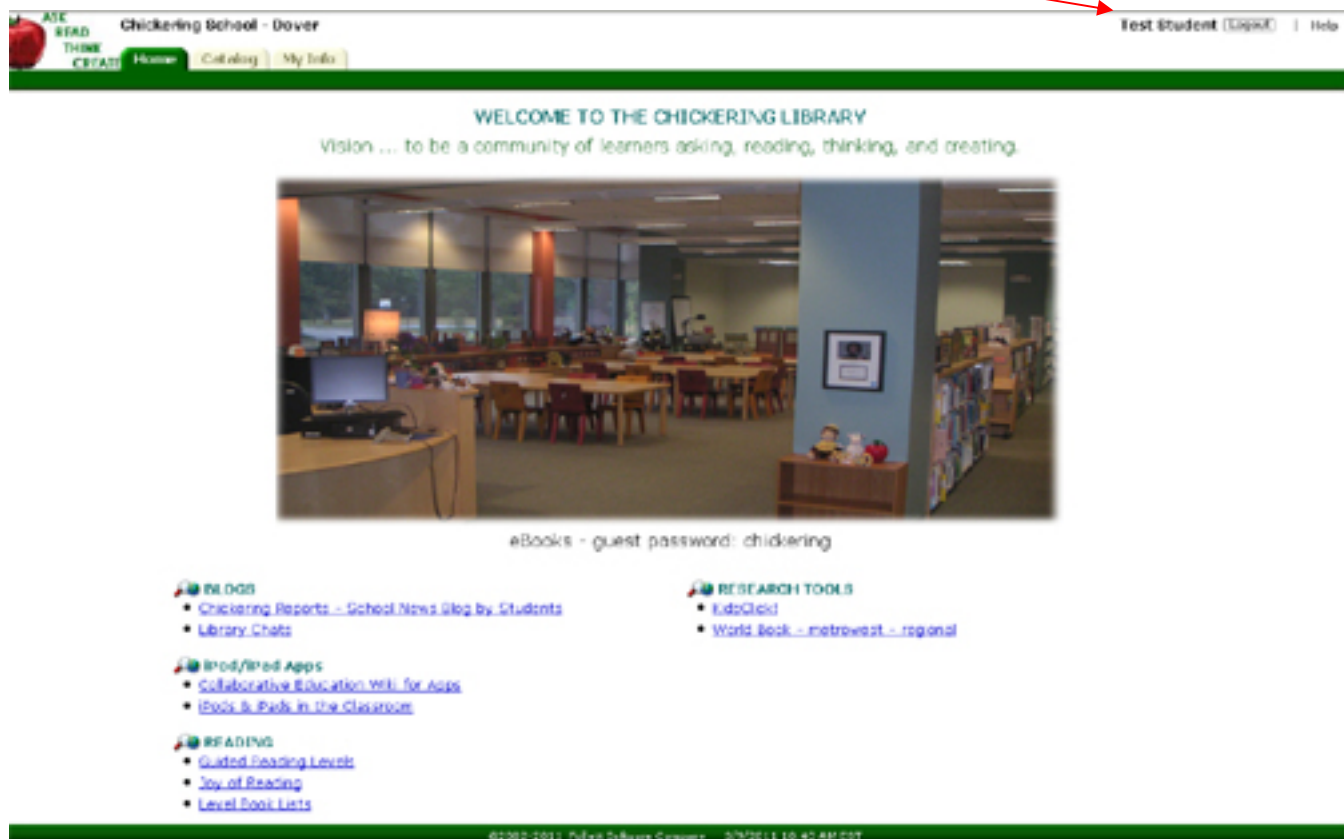

- You do not need to login to search the library catalog or WebPath Express.
- You do need to login if you want to create your own Resource List for a project; your own Resource List for books you want to read; access Resource Lists your teacher has prepared or that Mrs. Chase has created for your use.
- You do need to login if you want to reserve a book, that is available, to have ready when you come to school the next day.

## LOGIN

1. Click on the Login button in the upper right-hand corner of the window.
2. Use your school Username and Password to login (same as when you login to the computers at school)

Once you are logged in, you will notice your name in the upper right-hand corner where the Login button was located, now it says *Logout*.

In the upper left-hand corner, you will notice three tabs:

- Home – which takes you back to this library homepage
- Catalog – which takes you to the Library Catalog page
- My Info – which shows you the items you currently have checked out, fines, holds you have requested and books you have recommended.

# Creating a Resource List

Click on the **Catalog** tab.

The left-hand sidebar has options for you

- Library Search - the catalog page is where you search for library materials - only
- Destiny Quest – will be explained later
- Webpath Express – you can search educator evaluated, annotated websites, with grade content designations, and library materials at the same time.
- Resource Lists – you can view “public lists” and your lists and create Resource Lists here.

## Click on **Resource Lists**

**Two tabs:**  
**My Lists** – view lists you create  
**Public Lists** – view lists others have created for you to access.

To create a **new** Resource List – Click on

Now '*Name*' your Resource List and give a brief *Description* of the list, if it will be helpful; then *Save* the list.

For example:

You might name your resource list: "Tigers" since you are researching that topic for school.

You might describe your list as: "Resources for my non-fiction project: Grade 3"  
Then click on Save.

Now when you find resources, you can select this Resource List in which to add resources.

## Searching

Click on WebPath Express to search for resources both in the school library and the Internet.

Enter your keyword or search term in the search bar. i.e., "Tigers" Then click on the search button.

You can try a "specific" term but you may have more success using a more general term. For instance use Tigers instead of Siberian Tigers. OR "sports cars" or "race cars" instead of "Lamborghini".

Please see the next page for the results page.

## Two Tabs:

- Websites
- Titles (in the school library)

**Bolded** Tab is showing the results.

## Results information on Websites:

The screenshot shows a library search interface. At the top, there's a navigation bar with 'Home', 'Catalog', and 'My Info'. Below that, a search bar contains 'tigers'. The results are displayed in a list format. Each result includes a title, a brief summary, the URL, and a grade level indicator. The first result is from National Geographic, the second from Kidsplanet.com.au, the third from San Diego Zoo, and the fourth from Tigercrisis.com. Red circles highlight the URLs of the first three results. A 'Selected List' dropdown menu is visible at the top right of the results area, currently set to 'Tiger'. Red arrows point from the text boxes to the 'Selected List' dropdown and the 'Add to this List' buttons.

Selected Lists: has a drop-down menu – notice the small down arrow to the right. The most recent list is defaulted. If the name isn't the resource list you want to add items too, then select the correct one.

Notice that the list of websites tells you the Grade Level(s) as well as a summary of what types of information you will find on the website. (If you had done this search in Google, you would have 47,000,000 hits ... Where do you begin? How do you know what sites are good? ... this site gave you 128 hits which someone had already reviewed for you and told you what you would find on each of those 128 sites!)

As you look over this list, read each annotation (summary) of the information – look to see who has made the website ... do you know about them? For instance, the first site is by **National Geographic** ... a very reputable site for information about animals and the world. Not too sure about the second site but the third site is the **San Diego Zoo**, another reputable site. The fourth site is an organization that cares about the status of Tigers ... information about how tigers are endangered, which I would probably want for my research.

To add a Website to your Resource List, click on  . Do this for each site you want.

## Titles (Tab)

Click on this tab when you want to see items in the school library. They may be print resources or ebooks.

The results that are displayed are both Fiction and Nonfiction. Since the research is for your Nonfiction project, you will need to tell the Catalog to sort the items by Call number. This will keep all Nonfiction together and all Fiction together instead of them being mixed up together. Click the down arrow to show how you want the list sorted, choose "Call number".

The screenshot shows a library catalog search results page for the query "Tigers". The page header includes "Chickering School - Dover" and "Test Student (Logout) | Help". The search results are displayed in a table with columns for item title, call number, author, date, type, sex, and interest level. A dropdown menu is open over the "Sort by" column, showing options like "Title", "Author", "Date", "Type", "Sex", and "Interest Level". A red arrow points from the text above to the "Sort by" dropdown. Two red boxes highlight specific items: "Endangered tigers" with call number "599 TIGER" and "The Tiger's Egg" with call number "FIC BER".

Item Title	Call Number	Author	Date	Type	Sex	Interest Level
Tigers	GR 509.74 PCT	Petty,				
Endangered tigers	599 TIGER	Kalman, Bobbie,	1947-			
Tigers	599 TIGER	Ashby, Ruth,				
The Tiger's Egg	FIC BER	Berndt, Jon,				
Siberian tigers	GR 509.7 STP	St. Pierre, Stephanie,				
Zoobooks - Tigers	PROP MAG					

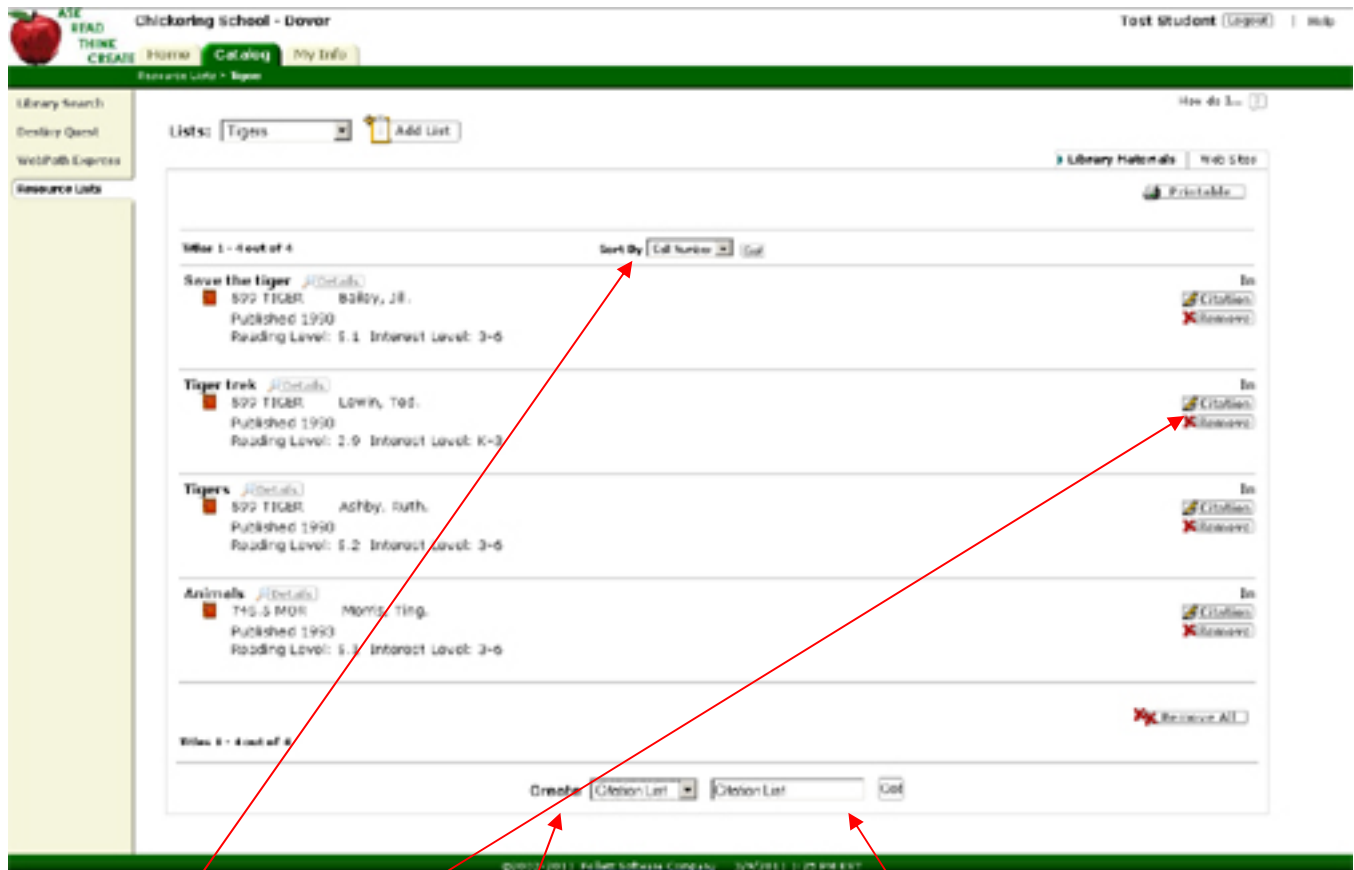

Nonfiction – think number

Fiction – think author's last name

When you click "GO" to sort, the list will return with Nonfiction titles first. If you click on "Details" next to each item title, you will see a one sentence summary of the information found in that item. To add the item to your Resource List ... make sure it still shows the correct Resource List in the "Selected List:" window; then click next to the item title.

When you have gathered your resources, now you can view your Resource Lists under the Resource Lists in the sidebar of the WebPath Express screen or MyInfo Screen.

You may add titles and remove titles from this list as you determine which resources you will use for your research. When you have only those resources you used for your research in your Resource List, you can create a Citation\* Page for your project.

\* Remember you must always “cite” the information (title, author, publisher, copyright or website title, date accessed, etc.) for the resources you used for your project. Destiny will help you create that Citation Page and you can give a specific name, i.e., “Tiger Citations”.

Citation pages should always be sorted by Author – so change the Sort By to Author in the dropdown window and click “GO”.

### Citation List

Ashby, Ruth. *Tigers*. New York: Aladdin Books, 1990. Print.

Bailey, Jill. *Save the tiger*. Austin, TX: Steck Vaughn, 1990. Print.

Lewin, Ted. *Tiger trek*. New York: Macmillan, 1990. Print.

Morris, Ting, and Neil Morris. *Animals*. New York: F. Watts, 1993. Print.

Now you can copy and paste this list into a Word document where you are writing your report or print and paste it on the back of your poster / project.
